8. Explain the difference between the internet and the web

The internet is a network of connected devices, like computers and phones, and provides services such as the world wide web and email. The web is a part of the internet where users can share information through web browsers, such as Google.

19.What is the difference between block and inline?

Block elements take up the whole width available, has a top and bottom margin, and starts on a new line. Inline elements do not start on a new line, and only take up as much width as necessary

28.Why is the 'alt' attribute important in an image tag?

Alt describes an image as text in case the image does not load, or if someone who is visually impaired can use a text reader to understand what it is supposed to show.

35.What does the method attribute do? What does the action attribute do?

Method attribute: Specifies how the form data is sent to the server.

 Action attribute: defines the action to be performed when the form is submitted
